SPECIFICATION DATA

SUGGESTED SPECIFICATIONS: _____ projection screen(s), _____ (H) x _____ (W), constructed of 2" diameter aluminum tubing with radius frame corners. Frame sections to be slip fit at corners. Lacing cord to be woven onto frame sections with preinstalled S-hooks for viewing surface attachment. Frame to be powder coated black with optional 6" wide masking cover to conceal lace cord and hooks. Optional masking cover includes Pro-Trim® to enhance appearance and absorb light surrounding the viewing area. Frame can be suspended from ceiling by means of included eyebolts installed on top frame section. Wall mount brackets and eye bolts included for wall or ceiling installation.

The Series 200 lace and grommet frame is designed for use with the following flexible lace and grommet screen surfaces (sold separately).

All Da-Mat® Foldable Black Backed, High Contrast Da-Mat®, Cinema Vision, High Contrast Cinema Vision, Pearlescent, Da-Tex®, High Contrast Da-Tex®, Ultra Wide Angle (Rear), and Dual Vision surfaces are seamless up to 16' high. High Contrast Cinema Perf, Audio Vision and High Contrast Audio Vision surfaces are available in sizes up to 8' high.

Screen frames with an outside dimension greater than 15'6" will have two-piece top and bottom or side frame sections.

Maximum frame outside dimension (height or width) is 30' for front projection and 20' for rear projection. Maximum screen viewing area (height or width) is 29' for front projection and 19' for rear projection.

Specifications subject to change without notice.
Overall frame dimensions ±1/4".

WHEN ORDERING, MARK APPROPRIATE SELECTIONS:

Designed for use with the following lace and grommet screen surfaces:
